

HOME MAINTENANCE

WASHING

Brush out extensions with a Wet Brush before getting into the shower. This helps prevent deep tangles and matting.

Use a sulfate-free shampoo and conditioner (Oribe, Stylist will provide recommended hair care line) to prolong your hair color and the extension color as well. Shampoo gently between the rows, no need for vigorous scrubbing.

Use a leave-in conditioner and oil (Oribe Gold Lust Oil, Oribe Run-Through Detangling Primer, and Oribe Supershine Moisturizing Cream) right after your shower (towel dry to get out moisture) and before you brush out your hair with the Wet Brush (again).

When brushing wet hair, start from your ends and work your way up to the scalp. Hold the hair in one hand (pinched in a ponytail) and brush down.

STYLING

Use a good heat protectant (Oribe Invisible Defense) before using any heat.

Rough-dry your hair 80% of the way (meaning no tugging at the extensions with a round brush or a comb, just use your hands and fingers.) This applies to wet hair at dry bars as well. Make sure to communicate to whoever is styling your hair to NOT round brush your hair from start to finish.

You can use a round brush and a small amount of tension to smooth your hair and the extension hair, the last few minutes of your blow dry.

If curling your extensions, run the extension hair through the curling iron to smooth the hair once or twice, before placing curls. This will give your extensions a more polished look, close the cuticle, and prolong the extension hair.

Feel free to use a heat protectant when styling.

SLEEPING

Brush the extension hair out, then place in a loose ponytail or braid.

OTHER

- After a few washes, the extension hair will expand, and take on a more realistic hair texture.
- If you notice any excess tangling or hair shedding, please contact BLADES STYLING, as these are quick fixes when addressed right away.
- You can live a normal active lifestyle with NBR, just treat the extensions with gentleness to keep them looking their best, the longest.
- NEVER let sunscreen or sun tan oil touch the extension hair as they will turn peach.

We hope you love your NBR extensions as much as WE do! Please feel free to text or call at 480-295-2050 if you have ANY questions regarding NBR.
